Personal Profile

A final-year Accounting and Finance student at DCU possessing practical experience in financial modelling, valuation, and technology risk analysis acquired during the AmplifyME Banking Accelerator Simulation (February 2026), where I honed my skills in DCF valuation, Enterprise Value (EV) analysis, trading comparables, and merger and acquisition transaction analysis. Demonstrated an additional technical capability in VS Code, Quarto, and GitHub, where I am currently building a website to showcase my projects and technical work. Through Kubicle and DCU's Business Analytics programs, I have established a robust foundation in statistical analysis and data visualisation, employing these competencies in Python, Excel, and Power BI on real-world datasets. I am inquisitive, adaptable, and goal-oriented, prepared to assist financial services clients in managing technological risks, adhering to future legislation and fostering trust in their systems and data. I am entirely committed to obtain an ACCA certification in order to provide high-impact advising value.

Education

(2023-2026) Bachelor's Accounting and Finance - Dublin City University

Relevant Modules: Financial Reporting, Management Accounting, Irish Company Law and Corporate Governance, Taxation, Auditing, Strategic Business Analysis

Relevant Project & Experience

AmplifyME – Banking Accelerator Simulation (Self-directed Practical Project)

- Executed a practical simulation to construct a sophisticated three-statement valuation model for a financial institution, directly correlating with fundamental technological risk duties.
- Data integrity: developed a comprehensive financial model that correlates revenue, EBITDA and net income to ascertain enterprise value. Employed

stringent logic to avert formula inaccuracies and maintain data integrity, reflecting the controls essential for dependable financial reporting.

- Risk mindset: consolidated market data from trading comparables to determine a valuation range. This analytical procedure necessitated a thorough, control-oriented approach to data validation and error detection.
- Analytics business: employed sophisticated excel methodologies to conduct a discounted cash flow (DCF) analysis, forecasting future cash flows to ascertain a current value. This illustrates the capacity to manipulate and analyse data within the fundamental systems that support client decision-making.

Academic Projects & Achievement:

1. Strategic Business Analysis – Sanofi Consulting Project

- Shows the capacity to quickly assimilate information about the food and agriculture industries and offer tailored guidance
- Create practical plans by analysing financial statements and market trends, with the goal of assisting small and medium-sized firms in improving performance and lowering operational risk
- Led a team of five to produce professional consulting reports, honing client-facing communication and presentation skills required for high-level advising work at a firm

2. Tax Policy Analysis – 2026 Fantasy Budget

- Gained expertise in evaluating the financial effects of carbon taxes, which is essential for guiding farming and agribusiness customers through Ireland's changing environmental compliance environment
- Mastered the application of R&D tax credits to assist SMEs investment in sustainable innovation and take advantage of financial opportunities

(2022-2023) Rathmines College of Further Education

QQI Level 5 English and IT – Seven Distinctions, Two Merits

(2019-2021) Chang Le Hua Qiao Zhong Xue Secondary School (2019 – 2021)

Subjects: Maths, Geography, English, Biology, History

IT Skills

- Skilled at cash flow forecasting and budgeting using Excel modelling
- Excellent at integrating Sage for financial tracking
- Expertise to create expert data reports using GitHub and Quarto for version control and team collaboration, guaranteeing effective and transparent analytical procedures

Language Skill

Native Chinese, fluent in English

Work Experience

(June 2024 – Present)

Ginzeng

Position: Sales Assistant

Duties:

- Ensure accurate financial reconciliation and data integrity by managing daily cash operations and point-of-sale transactions with 100% accuracy
- Resolve complicated customer complaints quickly and effectively while exhibiting the professional communication and emotional intelligence needed for high-level client-facing positions
- Develop enduring relationships with frequent clients by providing consistent service

(Jul 2022 - Jan 2024)

KFC Dublin

Position: Customer Server

Duties:
